Description/Title:

Firmware v2.00 Update for FX-305

Comments:

This firmware update adds a new auto power-off safety feature to the FX-305, which is controlled by parameter 18. This auto power-off feature allows you to set a time of 60 to 720 minutes, in 60-minute increments, after which the station will automatically turn off the heaters in case it is accidentally left running. When the auto power-off feature is triggered, the display will show the following screen:

As a reminder that the station is still physically powered on, a tone will sound 3 times every 60 minutes. Power cycling the station will reset the timer and return it to normal operation.

Please visit our online knowledge base at <https://kb.hakkousa.com>, where you can find the firmware download and step-by-step instructions in the Software section.

Part No:

FX305-03

Specification:

Unchanged
